

Don't Take Our Word For It

"Clear, concise designs portrayed exactly what we were looking for in our website. Y4H Designs was a tremendous asset in reaching our goals and a pleasure to work with."

Kyle J. Gallagher
www.takooler.com

"The number one selling point to our organization was Y4H Designs' capabilities to design a web site without making extraordinary demands on our staff. Y4H Designs understood the vision of what we were trying to accomplish and provided a turn-key design that fit our organizational and functional requirements. Our web site has received accolades from our high level national board of directors, state board members, corporate and foundation donors, student participants and alumni, and local and state program staff. For those organizations that have minimal time to devote to the design or re-design of a web site, we strongly recommend Y4H Designs."

Jim Koeninger, Ph.D., Executive Vice President
Jobs for America's Graduates
www.jag.org

"We called on Y4H Designs to develop a very special message for the members of our organization regarding a response to the September 11 attacks on America. I appreciated the willingness of their people to take our ideas and improve upon them. Everything I asked for, they delivered. It's reassuring to work with a web designer who listens to what we need, works on it until it's right, and gets the job done quickly."

Not Just Services...Solutions

Y4H Designs specializes in providing the solutions your business needs to succeed! We will work directly with you to design end-to-end solutions that are tailored to the needs of your business and your customers.

We take pride in delivering solutions with the utmost reliability, creativity, and integrity, all at very competitive rates.

Philosophy

Y4H Designs has over 10 years combined business, software, and Internet experience. Our staff is made up of previous small business owners, software gurus, and design specialists.

Our #1 Priority is customer satisfaction, not only for our clients, but for the customers of our clients. Our success is measured by your success!

Y4H Designs prides itself in understanding our customers and their business. This allows us to create a business solution using Internet technology to help our customers positively affect their bottom line.

Design

In today's business environment, it is not only crucial to have a presence on the Internet, but one that meets the needs of your customers and your business. A well-designed web site that offers solutions for customers can make the difference between success and failure.

A great website can be an extremely valuable tool, especially for small business. It can "sell" your services 24 hours a day, 7 days a week, and it can be there when the potential customer needs information about your business, even in those times when you can't.

Y4H Designs specializes in developing end-to-end Internet solutions. Our goal is to create an integrated solution that will help you grow your business using the Internet. We do this by listening closely to your needs, your existing business strategies, and your ideas.

Y4H Designs also designs Corporate Intranet and Extranet applications.

Web Hosting

At Y4H Designs, we value the business of all our customers and do our best to ensure the customers coming to your web site are happy,

so you'll be happy. We are not a hosting reseller. When you host with Y4H Designs, we maintain your site, your files, and your online business.

Y4H Designs also provides contracted collocated and dedicated-server hosting.

Email Services

Still using Yahoo or AOL or some other email system for your small business email system? How valuable is your corporate image? Are you presenting the same professionalism with your email address as you do with the rest of your business?

With Y4H Designs email services, you can have email addresses at your domain name for a very reasonable cost. We also provide tools to help you grow and manage your email accounts straight from the web.

Y4H Designs is ready to help take your business to the next level on the Internet.
